# Competent Person Training

SafeWaze offers Fall Protection Competent Person Training designed to teach best practices and methods for identifying and eliminating both predictable and existing fall hazards.

The training also provides a focused examination of the hierarchy of fall protection starting with eliminating hazards, and progressing through administrative control systems, and the application of passive, restraint and arrest systems.

Using the a combination of lecture, demonstration, and hands-on learning techniques, the course also prepares trainees to assume the role of a Competent Person.
