019-4017 Cab Anchor for SRD

019-4017

5/16" Bolt Spacers Locknut

Features and Benefits

The 019-4017 is a bracket designed for attachment of an SRD to a material / man lift cab anchorage point that is rated for fall protection.

Weight of Unit

.75 lbs (.34 kg)

Materials

Stainless Steel

Tensile Strength

5,000 lbs (2,267.96 kg)

Installation

Align anchor holes with SRD Top Swivel

Insert spacers between the SRD Top Swivel and the Cab Anchor

Insert the 5/16" bolt through the cab anchor bracket, spacers, and SRD Top Swivel

Thread the locknut onto the end of the 5/16" bolt and torque to 10-12 ft. lbs.

Refer to instruction SRD manual for specific SRD use instructions

***New lock nut must be used if the 019-4017 is removed and installed on another SRD**
