

X-Rail Horizontal Rail Systems

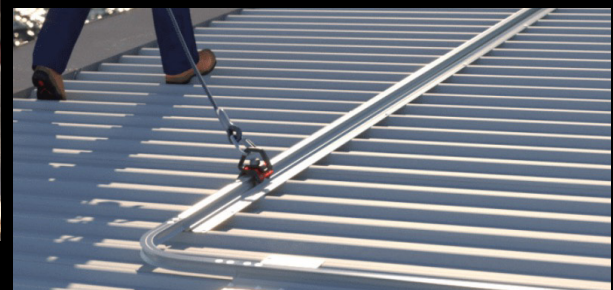

Rigid Rail. Flexible Use.

This innovative fall protection system is multi-directional with continuous movement for multiple users.

X-Rail Horizontal Rail Systems

- **Rigid Rail Solution**
Versatile protection for fall restraint and fall arrest, ideal for low clearance environments
- **Multi-Directional Use**
Overhead, rooftop and side wall application
- **Continuous Movement**
Corner installation allows turns for greater mobility
- **Multi-User System**
Increased value with up to 4 users at once
- **Modular Construction**
Innovative design allows for easy modification and future expansion
- **Convenient Installation**
System connects to existing structure with no on-site welding required
- **Meets Applicable OSHA and ANSI Standards**

COMPREHENSIVE SOLUTION

- **Preliminary Assessment**
Consultative approach ensures full understanding of your needs upfront
- **Custom Design & Engineering**
Full system development includes advance layout and final as-built drawings
- **Certified Installation**
Commitment to secure installation includes guides as well as testing results
- **Onsite Training**
Users fully trained on final system
