

Elevate Your Safety: Overhead Anchorage for Scaffolding

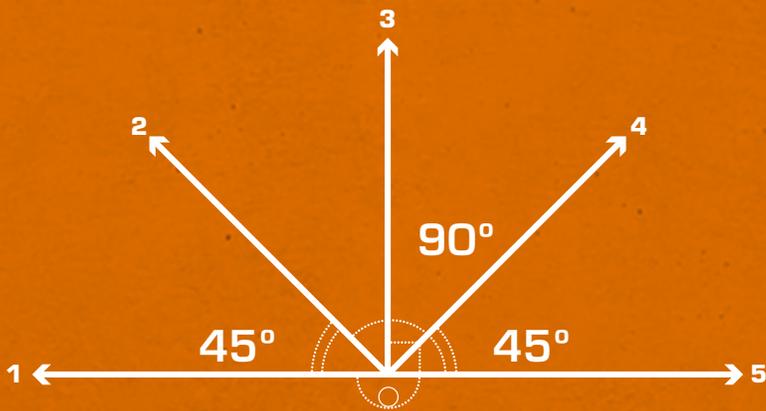

SCAFFOLD DAVIT ANCHOR

023-4104

SWIVELS EASILY, LOCKS SECURELY

Unique horizontal pivoting system has optimum adjustability to more easily keep anchor directly overhead. Locks into one of five angled positions.

Horizontal Swivel Feature

Reduce swing fall hazards with our pivoting system by positioning the anchor point directly overhead.

Easy one-handed operation to pivot davit arm

Arm locks securely in place to prevent movement during use

Installs quickly directly to vertical post with just two clamps

Flexible mounting locations clamps directly to vertical, supported scaffolding

Use for either fall arrest or fall restraint with the appropriate SRL or lanyard

NOTE: Lower eyelet is not for fall protection

SPECIFICATIONS:

Weight: 32 lbs.
Fits Scaffolding with: 1.6"-2" diameter
Anchor Dimensions: 40" x 18" x 2.4"
Minimum Breaking Strength: 5,000 lbs.
ANSI Standards: Z359.18-2017 Type A
OSHA Standards: 1926.502, 1910.140, 1910.66
