

Product Manual Part Number Lists

Subject: Adding New Part Numbers into Existing Product Manuals

Related Products: Safewaze Products

Related Standards: ANSI & OSHA

Date: 06-20-2025

Revision: 1

In accordance with American National Standards Institute (ANSI) requirements, Safewaze product manuals provide a list of the part numbers that correspond with the purchased product. These part numbers represent the different configurations of the product.

Safewaze is constantly designing new products, and updating existing products. When a product is updated, a new part number, or multiple new part numbers, are assigned to the product to represent the varying configurations that can be purchased.

At times, this means earlier versions of manuals that are already in the field will not list all available part numbers of the product. The most up-to-date manual will always be available on the Safewaze website. The user should verify the latest revision of the product's manual is being utilized for the full part number list, proper use directions, and installation information.

The part number lists may appear differently and may be placed in different sections of the manual based on the product purchased. For example, Self-Retracting Lifeline (SRL) manuals include configuration tables in the front, while Harness manuals list part numbers near the end.

For questions regarding the information in this Technical Bulletin, please contact Customer Service at (800) 230-0319.

SRL Part Number List Example:

PART NUMBERS AND CONFIGURATIONS COVERED:

Standards: ANSI Z359.14-2021

OSHA 1910.140, 1910.66 & 1926.502

Capacity: ANSI 130-310 lbs. (59-141 kg)

OSHA Up to 420 lbs. (191kg)
