

Industrial Rescuer Course

This Industrial Rescuer course is designed for anyone who works at height that is responsible for the fall protection rescue program as well as immediate supervisors of authorized rescuers. The course will provide students with the knowledge to utilize pre-engineered rescue equipment and techniques for safe and timely rescues. Students will be required to actively participate in practical rescue scenarios.

Prerequisite: Fall Protection Competent Person

Topics covered:

- Fall hazard elimination and control measures
- Applicable fall protection and rescue regulations
- Assessment of fall hazards to determine rescue methods
- Responsibilities of designated persons under the standards
- Detailed inspection and recording of rescue equipment components and systems
- Rescue system assessments to determine when a system is unsafe
- Development of written fall protection rescue procedures

This course includes classroom and hands-on activities with both a written and practical exam. Upon successful completion, each student will receive a certificate and wallet card acknowledging completion of Industrial Rescuer training that meets and exceeds OSHA and ANSI requirements.

Cost Per Student: \$876.50

Course Length: 2 Days (16 Hours)

Course Hours: 8am-4:30pm

Lunch Provided Each Day

Course Location: Safewaze Academy, 225 Wilshire Ave, SW Concord, NC 28025

Participants are required to wear long pants and stiff-soled shoes for the hands-on activities. Participants are also encouraged to bring their own gloves.
