

SAFEWAZE

**NEW PRODUCT
SPOTLIGHT**

contour

YOU'VE SPOKEN. WE LISTENED.

Tailored to the natural curves of the female form with a sleek, modern design, the Contour is the ultimate solution for every body.

» **ULTIMATE COMFORT**

Tailored to your curves

» **OPTIMAL FIT**

Women of all shapes and sizes

» **BREATHABILITY**

Keep cool during hot work

» **FLEXIBILITY**

Move naturally without restriction

Tested and refined by real working women, this gear is more than just a pink coat of paint on “unisex” harnesses usually made for men.

DESIGNED BY
WOMEN
ESPECIALLY FOR
WOMEN

THE FIRST FALL PROTECTION HARNESS DESIGNED AND BUILT BY WOMEN, FOR WOMEN.
For too long, women at height have been left hanging by the equipment they depend on.

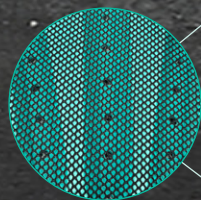

EXTREME ADJUSTABILITY

Ensures a secure fit on all body types

LIGHTWEIGHT, BREATHABLE PADDING

Superior airflow for all-day comfort

ADDITIONAL ADJUSTERS

One on each side to help fit your curves

INNOVATIVE LEG STRAP

Designed for increased flexibility while you work

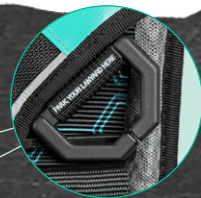

TOOL ANCHOR

Built-in convenience for up to 5 lb.

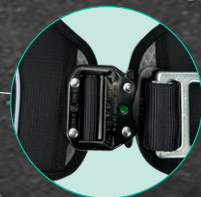

LANYARD KEEPERS

Breakaway design safely releases while protecting keeper

PRECISE STRAP ALIGNMENT

Quick-connect chest for easy adjustment

SIDE STRAPS

Helps adjust front torso straps and cinch extra webbing on back

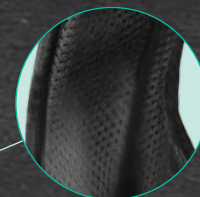

SUBPELVIC SUPPORT

Custom fit for increased safety

ERGONOMIC SHOULDER PAD

For balanced weight distribution

FIXED DORSAL D-RING

Prevents shifting

INTEGRATED CHANNEL

Makes connecting SRL-Ps a breeze

HARNESS OPTIONS TO MEET YOUR NEEDS

- Floating waist pad or full body styles
- Front or side positioning D-rings
- Quick-connect or tongue buckle legs

DESIGNED BY
WOMEN
ESPECIALLY FOR
WOMEN

The number of women entering the trades has grown 33% in the last 5 years – the highest rate in history.

A properly fitted harness is essential for both safety and comfort on the job. Contour sizing is tailored to the body structures of women and its size chart is different from other Safewaze harnesses. Please refer to the provided measurements to select the best size for your configuration. Measurement A (back torso strap) is based on user's height and is not adjustable, so it is a critical measurement for correct sizing. However, due to the additional adjustability of the harness, all other measurements are more flexible.

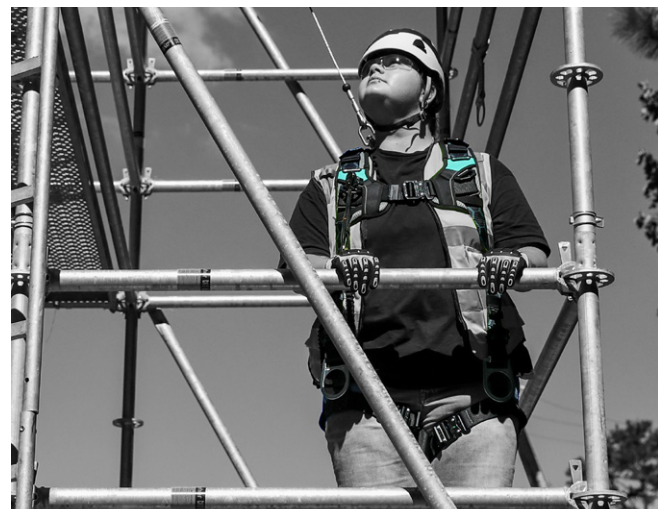

From the back, take a straight-down measurement from the top of the shoulder to the bottom of the glute (where the leg strap will sit).

From the front, take a straight-down measurement from the top of the shoulder to the top of the hip bone.

Measure around the waist at the belt line.

Measure around the thigh (where the leg strap will sit).

ALL MEASUREMENTS ARE TO BE TAKEN OVER CLOTHING
