

SAFEWAZE

**NEW PRODUCT
SPOTLIGHT**

Guardrail Base
025-13001

THE SAFEST FALL IS THE ONE THAT NEVER HAPPENS

PASSIVE PROTECTION. PRACTICAL DESIGN.

WHY PASSIVE PROTECTION?

- » Creates a physical barrier at exposed edges
- » Helps prevent falls before they happen
- » Protects workers within the guarded area without requiring a system connection

WHY THE SAFEWAZE GUARDRAIL BASE?

- » Supports temporary wooden guardrail systems
- » Stackable design saves storage and transport space
- » Pre-installed washers help simplify installation

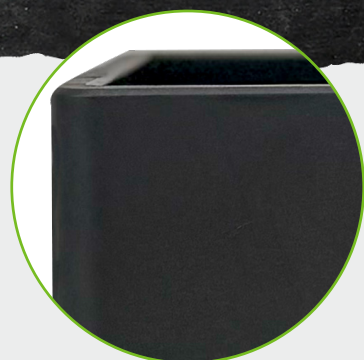

ONE BASE. MULTIPLE APPLICATIONS.

- » Residential construction
- » Commercial construction
- » Roofing
- » Concrete construction
- » Electrical, HVAC and plumbing work
- » General industry
- » Other applications requiring temporary edge protection

VERSATILE INSTALLATION

- » Wood
- » Plywood
- » Concrete

START WITH A STRONGER FOUNDATION

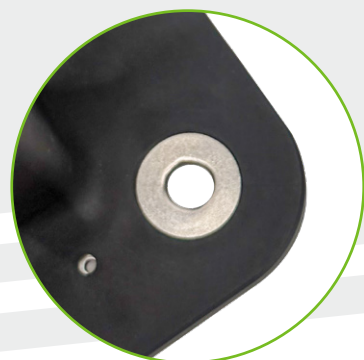

HIGH-STRENGTH CONSTRUCTION

Molded from high-strength, UV-resistant plastic for durable performance in demanding outdoor environments.

HIGH-VISIBILITY LABEL

A reflective wraparound label makes the base easier to locate and identify on active job sites.

PRE-INSTALLED METAL WASHERS

Metal washers are molded into the fastener holes, helping crews install the base faster while reducing loose components and material waste.

QUICK ACCESS TO INFORMATION

A laser-engraved plate with QR code provides convenient access to product information and documentation.

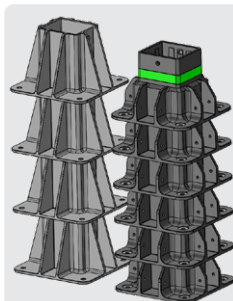

MULTI-DIRECTIONAL TOEBOARD SLOTS

Integrated slots support different toeboard orientations and help prevent tools and materials from falling over exposed edges.

KEY SPECS:

Materials: Nylon with glass fibers, stainless steel, aluminum
Weight: 2.0 lbs. (0.9 kg) per unit
Dims: 7.5" x 7.5" x 6"
 (19 cm x 19 cm x 15.2 cm)
System Capacity: 200 lbs. (90.7 kg)
OSHA Standards: 1926.502, 1910.29

STACKABLE DESIGN

Bases nest together to save space and make transport between job sites easier.

30% SPACE SAVINGS
